Summary

Passionate and detail-oriented Software Engineer with 4 years of experience building scalable backend services and dynamic frontend applications. Proven ability to lead projects from conception to deployment.

Skills

- Languages/Frameworks: Python, JavaScript, React, FastAPI, SQL
- Tools/DevOps: Git, Docker, GitHub Actions, AWS

Experience

Backend Engineer | Tech Solutions Inc. | 2021 - Present

- Designed and implemented a microservices architecture using Python and FastAPI.
- Optimized SQL database queries, reducing average API response times by 40%.
- Integrated automated CI/CD pipelines using Git and Docker.

Projects

Hostel Management System

A full-stack application for managing hostel room allocations and student records. Built with React and Python, utilizing SQL for robust data storage and Docker for containerized deployment.

Multiplayer Web Game

Developed a real-time interactive game using WebSockets and JavaScript. Handled complex state synchronization across multiple client instances.
